PROFESSIONAL SUMMARY

Software Engineer & Full-Stack Web Developer with 3+ years of experience designing and building scalable, high-performance web applications. Expert in React.js and Next.js on the front-end, with solid back-end proficiency in Laravel, PHP, Node.js, and Express.js, backed by strong database skills in MySQL and MongoDB. Skilled in UI/UX design via Figma and WordPress development, with a strong focus on clean, SEO-optimized code and delivering user-centric digital solutions.

KEY SKILLS

Frontend: JavaScript (ES6+), React.js, Redux Toolkit, Next.js, HTML/HTML5, CSS/CSS3

Backend: Laravel, PHP, Node.js, Express.js, RESTful APIs, Full-Stack Integration

Database: MongoDB, MySQL

CMS & Styling: WordPress, Tailwind CSS, Bootstrap, Responsive Design

Tools: Git, GitHub, Bitbucket, NPM

Methodologies: Agile, Scrum, SEO Best Practices, Web Performance Optimization

PROFESSIONAL EXPERIENCE

UNiFi — Dubai, UAE *08/2025 – Present*

Front-End Developer

Collaborative development of modern web interfaces for diverse client projects.

- Developed responsive web applications using React.js and modern CSS frameworks (Tailwind/Bootstrap).
- Built and maintained cross-browser compatible interfaces using HTML5, CSS3, JavaScript, and Bootstrap.
- Optimized application performance using React Lazy and Code Splitting to ensure fast loading and smooth navigation.
- Implemented SEO best practices to enhance website visibility and search engine ranking.
- Managed project deployments to live domains and handled site configurations.
- Maintained version control and collaborated within a professional team environment using Bitbucket.
- Customized and deployed WordPress websites, tailoring themes and plugins to meet specific client requirements.

AFAQ Company — Remote, Libya *09/2024 – 07/2025*

Full-Stack Developer

- Developed modern web applications using React.js, Next.js, and TypeScript.
- Built reusable components and integrated REST APIs for seamless data flow.
- Collaborated in a remote development team using Git for version control.
- Contributed to production systems with a focus on performance optimization.
- Implemented responsive designs following modern UI/UX principles.

SEF — Remote, Cairo, Egypt *05/2024 – 08/2024*

Front-End Developer

Worked within a structured development team to build modular and reusable web components.

- Developed modular, reusable UI components following Agile workflows.
- Collaborated closely with team members to deliver assigned modules on time.
- Ensured clean, well-documented code ready for seamless integration.

EDUCATION

Al-Hawash Private University — Homs, Syria

BSc in Software Engineering

Focused on modern web technologies and software architecture. Completed graduation project with honors.

11/2020 – 03/2025

PROJECTS

🌿 Plant Nursery Management System

React.js · Bootstrap · Node.js · Express.js · MongoDB · Python (AI)

A comprehensive full-stack platform for managing plant nursery operations with AI-powered plant classification based on environmental conditions.

- Built a multi-role dashboard with role-based access control for employees (delivery, farmers, event coordinators).
- Integrated Stripe and PayPal payment gateways supporting both online and cash transactions.
- Developed an AI module using Python to predict plant types based on suitable environmental conditions.
- Implemented digital contract system between nurseries and flower shops.
- Added real-time weather forecasting, advanced filtering, and a news feed with comments, likes, and abuse reporting.

🌐 UNiFi Official Website & Admin Dashboard

unifi-me.com

React.js · Bootstrap · Framer Motion · React Lazy · SEO

Developed the official corporate website for UNiFi with a fully dynamic admin dashboard.

- Built responsive front-end UI with smooth animations using Framer Motion and optimized loading via React Lazy.
- Designed and connected REST API endpoints using JSON Server (npx json-server).
- Developed a complete admin dashboard to manage site content, colors, and layout dynamically.
- Applied on-page SEO best practices to improve search engine visibility.

🏷️ Auction Management System

motionauctions.com

HTML · CSS · JavaScript · Bootstrap · PHP · Laravel

A fully featured auction platform supporting both live and silent auction formats.

- Implemented real-time live auction and silent auction management with full bidding logic.
- Built complete auction lifecycle management including item listing, bidding, and winner selection.
- Developed secure backend with Laravel handling authentication, auction rules, and data integrity.
- Designed intuitive UI with Bootstrap ensuring responsive experience across all devices.
